PERSONAL PROJECTS

BlackJack Game [↗](#)

- In this project, I designed and developed an engaging web-based Blackjack game using JavaScript, CSS, and HTML. Through this endeavor, I honed my programming skills and gained a deep understanding of game mechanics and logic.
- Deployed at: <https://my-black-jack-game-x8au.vercel.app/>

Personal Portfolio Site [↗](#)

- Building my own personal portfolio site was an incredible learning experience. Using JavaScript, HTML, CSS, I designed a visually appealing and responsive site that showcases my projects and skills.
- Deployed at: <https://portfolio-v2-delta-six.vercel.app/>

Products Listing Page [↗](#)

- In this project, I successfully developed a responsive and user-friendly product listing page using JS, CSS, HTML and Vite. The page dynamically rendered product data from a JSON file, allowing users to explore various products with sorting and filtering options for easy organization.
- Deployed at: <https://product-listing-page-nine.vercel.app/>
